

# Career Education Day @ Wilson Mall

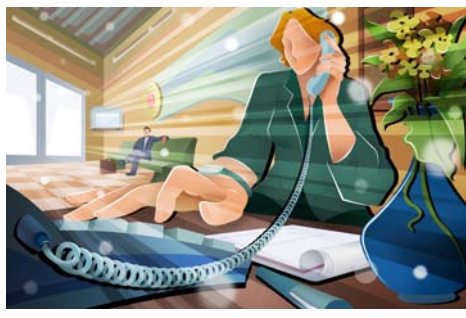

**Tuesday & Wednesday - November 17-18, 2009**

8th grade students and their teachers will have an opportunity to interact with experienced practitioners in various professions and visit company displays to learn more about what jobs are available to them in Wilson County.

What we need from you:

- professionals who can excite and engage students about their careers
- display booths highlighting products and/or services offered by your company

This two day event will allow more than 950 students to participate in panel interviews with representatives from various businesses and career paths. The students will get answers to questions about the careers they have identified as their areas of interest.

Wilson Community College will present the True Colors curriculum. Students will visit a variety of booths exhibiting high school academy strands, and local businesses.
